A4 MONOCHROME PRINTER

► print ► copy ► scan ► fax

## THE PROFESSIONAL DESKTOP PRINTER WITH LOW NOISE.

In addition to Kyocera's own controller language PRESCRIBE, this high performance printer comes with PCL6 and PostScript 3 emulation. The cost-effective ECOSYS technology ensures long-term gains.

- 18 pages per minute with 1,200 dpi quality
- 250-sheet closed paper cassette with paper gauge
- 3,000 pages starter toner
- Easy connection with USB and parallel interface
- Powerful controller with 32 MB RAM as standard
- PowerPC 405/266 MHz
- Long-life components

Optional network connectivity means people in a workgroup can easily share the printer.

A microfine toner for 6,000 pages minimises user intervention and guarantees large print runs.

## A4 MONOCHROME PRINTER

ECOSYS devices are designed to minimise both purchase costs and running expenses, such as maintenance, administration and consumables. The cartridge-free system requires only the toner to be replaced. The modular design concept allows you to add workflow-enhancing functions and a wide variety of paper handling capabilities as required. Integrated system software provides long-term cross-network compatibility. Kyocera's long-life components cost you and the environment less.

### System platform:

The FS-920 offers USB and parallel connectivity as standard as well as optional network connectivity and delivers problem-free system administration. Kyocera's single platform technology means that the same driver can be used for every Kyocera PCL/PostScript print device on the network; from single-user desktop printers to high end multifunctional systems. Only Kyocera offers this effortless combination of IT sophistication and high performance paper handling expertise.

### PRESCRIBE IIe:

With the Kyocera page design and control language PRESCRIBE IIe, even complex graphics, logos and forms (even multipart forms) can be created independently of the system and saved and updated in the printer. Consequently, integration into print files no longer applies. They are only accessed as required and therefore relieve the load on the network.

### KM-NET for Clients/KM-NET Viewer:

The settings of all printers on the network can be checked visually and amended from any Windows® PC. KM-NET for Clients enables easy setup and monitoring of the printer status via parallel, USB or network connection. KM-NET Viewer is an advanced printer management software tool using the standardised protocol SNMP.
